

33. (New) A floral grouping display assembly, comprising:

a wall;

a floral grouping having a bloom end and a stem end; and

a transparent sheet of material formed to define a container, the floral grouping

disposed in the container with the bloom end of the floral grouping exposed,

the sheet of material being releasably connected to the wall to display the

floral grouping on the wall so that substantially the entire length of the floral

grouping is visibly displayed on the wall.
